

## Media Satellites & Balls

CMI provides media satellites and balls for grinding, milling, valve and bearing applications, in the widest possible range of materials and sizes. This product is available in as-sintered, semi-finished and fully finished condition to suit the dimensional and finish requirements for specific applications.

Our Cemented Carbide products are available in a wide range of grades from 6% sub-micron material for maximum hardness to corrosion resistant and special alloy grades for Oil & Gas.

With the widest combination of sizes, grades and finish conditions available, CMI customers never have to compromise on performance.

### Size Range & Availability By Material Type

Diameter	Tungsten Carbide	Aluminum Oxide	Silicon Carbide	Silicon Nitride	Zirconium Oxide
1mm	★	-	-	-	-
2mm	★	-	-	★	-
3mm	★	★	-	★	★
4mm	★	★	-	★	★
5mm - 25mm	★	★	★	★	★
26mm - 50mm	★	★	-	★	★
50mm - 101mm	★	★	-	★	-

*All CMI Material Grades are produced using 100% virgin raw materials & the latest technology for maximum reliability and performance*
